

Technical data sheet

Vertical bend, three-compartment, height 28 mm

Item no. 7400656

For vertical direction changes of screed-covered underfloor installation ducts (wall connections, supplies).

St	Steel
FS	Strip galvanised

Additional product text, instruction

An important precondition for correct underfloor installation is the screed structure. In the case of a screed-covered system, it is important that the screed thickness of the duct is at least 35 mm, to avoid the formation of cracks (DIN 18560).
Screed height: 60 mm only for on-floor connection technology (Telitank), 70 mm or more for underfloor connection technology.
